<b>K8 Retailer</b>	<p>K8 Retailer is an integrated retail ERP solution. It enables retail operations, warehouse and distribution management and financials to work within a single solution, with off-line sales functionality. It is designed to meet the needs of the medium to large business.</p> <p>Please see the K8 and Retailer factsheet for more details.</p>
<b>K8 Layered Applications</b> **	<p>K8 Layered Applications comprise of a suite of software applications and apps that have been developed to deliver optimised, mobile friendly experiences to users on Smartphones and other SMART devices. Note that these applications are designed to integrate with K8 and to utilise core K8 features and, as such, versions of these applications may be restricted to operate with specific versions of K8.</p>
<b>K8 Layered Application: K8 ePOD</b> **	<p>K8ePOD is a Layered Application which provides the ability to capture proof of delivery detail, including recording the recipient and their signature, for each delivery drop made. It allows for the delivery manifest, as built within K8, to be exported to a mobile device and for the delivery or collection for each drop to be confirmed remotely. Signatures, notes and photographs are automatically uploaded into K8 when the device is connected to the airwaves, with this detail stored against the specific delivery or collection within K8.</p>

	Please refer to the K8 ePOD factsheet for more details.
<b>K8 Layered Application: K8 eReceipts **</b>	<p>K8 eReceipt is a Layered Application is designed for use within a K8 standard branch (non WMS), enables a user to select a purchase order and to confirm receipt of expected lines from that purchase order, allowing for the receipt of various types of product.</p> <p>Please refer to the K8 eReceipts factsheet for more details.</p>
<b>K8 Layered Application: K8 ePick **</b>	<p>K8 ePick is a Layered Application which is designed for use within a K8 standard branch (non WMS), enables a user to select a pick to be undertaken and to then be guided to each bin in turn to process the pick. The user may confirm the quantity that is being picked either by keying the number or they may scan the product barcode and have the quantity picked automatically incremented.</p> <p>Please refer to the K8 ePick factsheet for more details.</p>
<b>K8 Sales Portal **</b>	<p>K8 Sales Portal is designed to enable a user to place a sales order via the Portal and to have it raised within K8, using this online web based solution.</p> <p>Please refer to K8 Sales Portal factsheet for more details.</p>
